**MeridianLink Develops Credit-Reporting Interface to
easyLENDER Loan Origination Software from Fiserv**

COSTA MESA, California – October 16, 2003 – MeridianLink, Inc., has created an interface between its Mortgage Credit Link credit reporting system and the easyLENDER[®] family of loan origination and processing software solutions from Fiserv Lending Solutions (a business unit of global financial software leader Fiserv, Inc.). The new interface enables easyLENDER software users to gain instant, online access to borrower credit data through Mortgage Credit Link.

The MeridianLink credit interface operates through easyACCESS[™], the electronic partner network solution (EPN) developed for easyLENDER users by Fiserv Lending Solutions. easyACCESS is an easy-to-use EPN that connects a wide range of third-party service providers to easyLENDER. MeridianLink provides credit report data in a MISMO-standard, easyACCESS-compatible XML format that seamlessly uploads liability data into the easyLENDER database.

The new credit interface gives easyLENDER software users the flexibility to order credit reports from an expansive list of credit-reporting agencies that use the Mortgage Credit Link system.

“Fiserv is a renowned name in the financial and lending software industry,” says Jem Nguyen, MeridianLink Director of Business Development. “We’re proud to have our technologies work together because of the value we provide to our respective client bases. Our interface provides a seamless link for easyLENDER software users to connect to the most advanced credit reporting system in the industry.”

About MeridianLink, Inc.
